

# NetworkAnalyzer Tutorial #1

## Creating Network Models

Jonathan R. Karr  
jkarr@stanford.edu

Department of Bioengineering  
Stanford University

## Tutorial #1

### Creating Network Models

- Register a NetworkAnalyzer user account
- Create an NF- $\kappa$ B network model
- Export images of the NF- $\kappa$ B network
- Save the network to the NetworkAnalyzer database

## Tutorial #1

### Creating Network Models

- Register a NetworkAnalyzer user account
- Create an NF- $\kappa$ B network model
- Export images of the NF- $\kappa$ B network
- Save the network to the NetworkAnalyzer database

## Tutorial #2

### Visualizing Experimental Data

- Open the saved NF- $\kappa$ B network
- Associate the network with experimental data from CytoBank
- Export animations of the NF- $\kappa$ B network

## Tutorial #1

### Creating Network Models

- Register a NetworkAnalyzer user account
- Create an NF- $\kappa$ B network model
- Export images of the NF- $\kappa$ B network
- Save the network to the NetworkAnalyzer database

## Tutorial #3

### Advanced Topics

- Automatic network layout
- Advanced rendering options
- Collaboration: sharing & publishing networks

## Tutorial #2

### Visualizing Experimental Data

- Open the saved NF- $\kappa$ B network
- Associate the network with experimental data from CytoBank
- Export animations of the NF- $\kappa$ B network

- Navigate to  
`covertlab.stanford.edu/projects/NetworkAnalyzer`
- Explore website – gallery, tutorials, help
- Register new user account
- Login to NetworkAnalyzer
- Demonstrating creating new network in diagram mode
- Save network to database
- Logout

## Summary

- Registered a new NetworkAnalyzer user account
- Created an NF- $\kappa$ B network model
- Exported images the NF- $\kappa$ B network
- Saved the network the NetworkAnalyzer database

## Next Time

- Reopen the saved NF- $\kappa$ B network
- Associate the network with experimental data from CytoBank
- Export animations of the NF- $\kappa$ B network
